

## Assess Your Organization's AI Maturity

**Instructions:** Select the most appropriate option for each aspect of your organization. Answers are assigned a point value. At the end, tally your score to receive feedback on your organization's AI maturity level and recommendations for improvement.

***Using Gartner's AI Maturity Model, where does your company fall on this maturity line?***

- A) Initial (1 point)
- B) Developing (2 points)
- C) Defined (3 points)
- D) Managed (4 points)
- E) Optimizing (5 points)

***Using the Generalized AI Maturity Model, how would you rank your company when it comes to AI maturity?***

- A) Very Low (1 point)
- B) Low (2 points)
- C) Moderate (3 points)
- D) High (4 points)
- E) Very High (5 points)

**How does your company assess the maturity of these five key aspects below according to the Generalized AI Maturity Model?**

***AI Strategy:***

- How well-defined and integrated is your organization's AI strategy, policy, and process?
  - A) Nonexistent (1 point)
  - B) Informal and ad-hoc (2 points)
  - C) Formalized but not fully integrated (3 points)
  - D) Well-defined and integrated into overall business strategy (4 points)
  - E) Optimized and continuously improving (5 points)

**Data Management:**

- How effectively is data managed and utilized for AI initiatives?
  - A) Poorly managed, data silos present (1 point)
  - B) Basic management, some data sharing (2 points)
  - C) Well-managed, integrated data systems (3 points)
  - D) Highly effective, data-driven culture (4 points)
  - E) World-class data management and utilization (5 points)

## **Technology:**

- What level of technological infrastructure supports your AI efforts?
  - A) Minimal or no AI-specific infrastructure (1 point)
  - B) Basic infrastructure, limited capabilities (2 points)
  - C) Adequate infrastructure, moderate capabilities (3 points)
  - D) Advanced infrastructure, high capabilities (4 points)
  - E) Cutting-edge infrastructure, industry-leading capabilities (5 points)

## **Skills:**

- Does your organization have the necessary AI skills and expertise?
  - A) No AI-specific skills or expertise (1 point)
  - B) Limited skills, relying on external help (2 points)
  - C) Moderate skills, some in-house expertise (3 points)
  - D) Strong skills, robust in-house expertise (4 points)
  - E) Exceptional skills, industry-leading expertise (5 points)

## **Governance:**

- How robust are the governance frameworks guiding AI use?
  - A) Nonexistent (1 point)
  - B) Basic, informal governance (2 points)
  - C) Formal governance but not comprehensive (3 points)
  - D) Robust governance, comprehensive policies (4 points)
  - E) Exemplary governance, continuously updated policies (5 points)

## ***Total Score and Feedback***

Calculate your total score by adding up the points from each question.

## Total Score:

- **7-14 points: Initial Stage**
  - Your organization is in the early stages of AI maturity. Focus on establishing foundational AI strategies and basic governance frameworks. Prioritize basic data management practices and begin investing in AI-specific skills and infrastructure.
- **15-21 points: Developing Stage**
  - Your organization is starting to develop its AI capabilities. Enhance your AI strategy by integrating it more closely with overall business goals. Improve data management and invest in moderate technological infrastructure. Build in-house AI expertise and formalize governance policies.
- **22-28 points: Defined Stage**
  - Your organization has a defined AI strategy and is making good progress. Continue to refine and integrate your AI strategy into all business processes. Focus on creating a data-driven culture and advancing your technological infrastructure. Strengthen AI skills and ensure comprehensive governance frameworks are in place.
- **29-35 points: Managed Stage**
  - Your organization is managing AI initiatives effectively. Your AI strategy is well-integrated, and your data management practices are highly effective. Invest in cutting-edge technology and maintain strong in-house AI expertise. Regularly update and refine your governance frameworks to stay ahead.
- **36-40 points: Optimizing Stage**
  - Your organization is at the forefront of AI maturity. You have an optimized AI strategy, world-class data management, cutting-edge technology, exceptional skills, and exemplary governance. Continue to innovate and lead in AI maturity, ensuring continuous improvement and adaptation to new advancements.
